

Shreevatson Babu Sreegeetha

Folsom, CA | sshreev2703@gmail.com | (669) 588-9108 | linkedin.com/in/shreevbabu | github.com/shreevbabu

Education

Cal Poly San Luis Obispo

San Luis Obispo, CA

B.S. Computer Science | GPA 4.00

Junior standing

Relevant Coursework: Software Engineering, Database Management Systems, Data Structures & Algorithms, Linear Analysis I, Calculus III, General Physics, Ethics in Science & Tech

Additional: Scaler Academy (InterviewBit) - interview-focused Data Structures & Algorithms (in progress)

Skills

Languages: Python, C++, Rust, TypeScript/JavaScript, Dart, SQL, HTML/CSS

Frameworks: React, Flutter, Firebase/Firestore, REST APIs

Tools: Git/GitHub, Figma

Experience

AI Research & Data Science Intern, Encephlo · Remote

Dec 2025 - May 2026

- Designed and ran a months-long study on how students engage with the LLM tutor, and turned the findings into changes the team added to the product roadmap.
- Built a Firebase/Firestore pipeline that captured 200+ real user sessions and fed them into live analytics.
- Tracked engagement metrics like session depth and retention; my recommendations lifted the next cohort's engagement by about 22%.

Software & Data Engineering Intern, Dokken Engineering - Sacramento, CA · On-site

Jun 2025 - Aug 2025

- Built Python pipelines to clean and standardize 10,000+ legacy project records, cutting file-retrieval time for engineers by about 65%.
- Worked with licensed engineers to design clearer data-entry rules, which cut downstream errors by about 40%.
- Built Excel dashboards that leadership adopted for their weekly project reviews.

Freelance Full-Stack Developer, Self-Employed - Folsom, CA · Hybrid

May 2024 - Jul 2026

- Built and shipped full-stack websites for 4+ local businesses, integrating online booking, Stripe payment processing, and dynamic photo galleries.
- Ran each project start to finish on React, TypeScript, and Firebase, including training clients to maintain the site themselves.

Projects

BrighterMinds | React, TypeScript, Firebase

- Partnered with BrighterMinds, a student meditation organization, as their lead developer to build their website into an outreach platform.
- Built the full site in React, TypeScript, and Firebase, with guided sessions organized around specific student stressors, such as exam prep and sleep.
- Membership nearly tripled after launch; trained their team to update and run the site themselves.

"G0" - Published Steam Game | C++

- Led the scripting team on G0, a game built with a 15-person crew and shipped commercially on Steam.
- Wrote core gameplay in C++ from scratch with no game engine: physics interactions, movement, and progression systems.
- Ran the release end to end (Steam SDK, build tooling, store page, patches); won Outstanding Student Project at Sacramento's Capital Creative Showcase.

Rubik's Cube PR Scoring & Analysis Tool | React, TypeScript

- Built a live stats platform, solo, that ranks 50+ competitors per event at UC Berkeley speedcubing competitions.
- Wrote the algorithms behind rolling and outlier-trimmed averages (Ao5/Ao12) and real-time leaderboards; still used and maintained by the cubing community.

Food Delivery App - Rural India | Flutter, Dart, Firebase

- Built a cross-platform app to fill food-delivery gaps in underserved rural areas of India, alongside an industry engineer.
- Set up a real-time Firebase order system with logins and delivery tracking, tuned to run on slow connections with offline sync.

Monte Carlo Options Pricer | Rust

- Built an options/ETF pricing engine in Rust using Monte Carlo simulation, pricing a contract in under 10ms.
- Modeled the Greeks and volatility surfaces, and designed the engine so new pricing models drop in without touching the core.

Leadership & Activities

Team Captain, Varsity Cross Country & Track, Folsom High School

2022 - 2026

- Four-year varsity athlete and captain. Took the team from near the bottom of the league to its best season in school history and a top-3 finish, and qualified for the California state championships twice.
- Recruited five freshmen, mentored underclassmen, and wrote training plans for the whole team.

Student Senate Representative, Folsom High School

2022 - 2024

- Represented students in weekly meetings with administration to fix real campus safety issues.
